For 25 years, Duke’s lung transplant program has been one of the largest and most successful in the world. With over 1700 lung transplants performed, our team understands all aspects of lung transplant, from process to planning, organization and the incorporation of the multidisciplinary components that are key to good outcomes. Our team is experienced in lung transplant across the age and disease spectrum, as well as multorgan transplant. We are also leaders in transplant research, having contributed to much of the pivotal knowledge that guides current practices and as the recipients of the first lung-focused $13 million NIH Clinical Trials in Organ Transplantation (CTOT) grant which will lead to advances in future care.

This symposium is designed to help you understand how to optimize lung transplant candidate selection as well as perioperative and long-term management of lung transplant recipients. This is a unique opportunity to broaden your transplant expertise and learn the pearls and pitfalls of lung transplant from our established team of experts.

Duke Lung Transplant Symposium
AUGUST 25–26, 2017
Duke University Campus • Trent Semans Center Great Hall
Searle Center Drive, Durham, NC 27710

Presented by: Duke Transplant Center
FRIDAY  AUGUST 25, 2017
7:15 – 8:00 am  Registration
8:00 – 9:00 am  Pre-Transplant Management
John Reynolds, MD
9:00 – 10:00 am  Speech Pathology and Lung Transplant Patients: Evaluation and Treatment
Jay Kerner, MA CCC-SLP
10:00 – 10:15 am  Break
10:15 – 11:15 am  Psychosocial Factors Pre and Post – Transplant. What We Know and How Providers Can Help
Krista Ingle, PhD
11:15 am – 12:15 pm  Global Perspective on Lung Transplantation
Dirk Van Raemdonck, MD, PhD
12:15 – 1:00 pm  Lunch (provided)
1:00 – 2:00 pm  Maximizing the Gift of Life: Organ Donor Management and Allocation
Danielle Niedfeldt, RN, JD
2:00 – 3:00 pm  HIV, Hepatitis, Lung Transplant: No Longer Forbidden Bedfellows
Cameron Wolfe, MD, MPH
3:00 – 3:15 pm  Break
3:15 – 4:15 pm  Challenges and Opportunities for the Treatment of Donor Specific Antibodies
Amanda Hubert, PharmD, BCPS

SATURDAY  AUGUST 26, 2017
8:00 – 9:00 am  The Journey to Transplant: Referral to Listing
Cindy Lawrence, RN, MSN
9:00 – 10:00 am  The Management of Post-Transplant GERD: Is Surgical Intervention Necessary?
Jacob Klappper, MD
10:00 – 10:15 am  Break
10:15 – 11:15 am  Technical Pitfalls and Challenges of Lung Transplantation
Matthew Hartwig, MD, MHS
11:15 – 12:15 pm  Acute Cellular Rejection vs. Antibody Mediated Rejection
Omar Mohamedady, MD
12:15 – 1:00 pm  Lunch (provided)
1:00 – 2:00 pm  Extracorporeal Photopheresis
Mitchell Horwitz, MD
2:00 – 3:00 pm  Panel Discussion and Q&A

LEARNING OBJECTIVES
At the conclusion of this activity, all participants should be able to:
1. Identify current practice guidelines in order to provide optimal care to patients undergoing lung transplant.
2. Identify current initiatives at Duke and internationally, surrounding the care of the lung transplant patient.
3. Identify and discuss risks associated with lung transplant allograft rejection and dysfunction as well as current identification and treatment practices in the lung transplant patient.
4. Identify current practices at Duke regarding the referral to listing process and identification of appropriate lung transplant candidates.

REGISTRATION INFORMATION
Register Online: Open May 1st 2017
Payment Accepted: VISA or Master Card
Registration fee for the conference is $275.00. Please register online.
Registration fee for all Duke staff is $75.00. Please register online.

LEARNING OBJECTIVES
- Identify and discuss potential complications associated with immunosuppression, infection, rejection, and effective management in the lung transplant patient.
- Identify current practices in organ allocation and management in the United States as well as abroad.
- Identify and discuss potential complications associated with psychological concerns in the pre and post lung transplantation.
- Identify current practices at Duke regarding the referral to listing process and identification of appropriate lung transplant candidates.

TARGETED AUDIENCE
- This activity is designated for transplant coordinators, nurses and physicians that care for or are interested in the care of the pre and post lung transplant patient.
- All targeted audience members are eligible to receive Joint Accreditation credits for this activity. No attendance certificates are issued for this course.

CREDIT DESIGNATION
Duke University Health System Clinical Education and Professional Development designates this activity for up to 13 credit hours for nurses, a maximum of 13 AMA PRA Category 1 Credits™ for physicians, as well as up to 13 ACPE credits for pharmacists. Nurses, physicians, and pharmacist should claim only credit commensurate with the extent of their participation in the activity.
